

ERIC VICTORY ONYINYECHI

AI / ML ENGINEER

Phone: 08145189459 | Email: ericovictory@gmail.com
GitHub: github.com/EricVictory01 | LinkedIn: Victory Eric

PROFESSIONAL SUMMARY

Ambitious AI/ML engineer and Computer Science student at the University of Nigeria, Nsukka, building end-to-end machine learning and deep learning solutions with Python, TensorFlow, Scikit-learn, and Streamlit. Founder, class representative, and award-winning communicator.

SOFT SKILLS

Technical Communication • Cross-Functional Collaboration • Leadership & Team Coordination • Analytical Problem-Solving • Stakeholder Empathy • Adaptability

TECHNICAL SKILLS

AI & ML Frameworks: Python, TensorFlow, Keras, Scikit-learn, pandas, Matplotlib, Streamlit

ML Techniques: CNNs, Supervised & Unsupervised Learning, K-Means Clustering, PCA, Feature Engineering

Tools & Design: Git, GitHub, Canva, CorelDRAW

WORK EXPERIENCE

Customer Care Representative | Mar 2026 – Present
Tisa Drive Limited

- Handle customer enquiries and complaints promptly, calmly, and professionally with clear, accurate information.

Social Media Manager | Apr 2026 – Present
Chimez Shoe Room

- Manage the brand's social media content strategy and audience engagement, designing visuals in Canva.

CEO / Managing Director | Jan 2024 – Present
Our AI Empire Fortress & Grandeza Studio

- Create jingles, lyrics, and customised songs that help clients communicate their message through music.
- Lead video editing and graphics design for clients in Enugu and Port Harcourt.

Computer Operator & Trainer | Nov 2024 – Jan 2026
Teen Tech Hub

- Managed structured data entry and digital records; trained students in typing, software use, and computer fundamentals.

AI / ML PROJECTS

1. Handwritten Digit Recognition (CNN)

TensorFlow, Keras, Python | github.com/EricVictory01

- Built and trained a Convolutional Neural Network (CNN) to classify handwritten digits across multi-class image inputs with high validation accuracy.
- Implemented pixel normalisation, tensor reshaping, and evaluation metrics to ensure reliable generalisation on unseen digit samples.

2. Customer Segmentation with K-Means

Scikit-learn, pandas, Streamlit, Matplotlib

- Unsupervised ML project grouping customers by age, marital status, education, work experience, family size, and spending score for targeted marketing and pricing.
- Cleaned data (median/mode imputation), encoded categorical features, scaled with StandardScaler, trained 4-cluster K-Means, and visualised clusters via PCA (7 features reduced to 2).
- Built an interactive Streamlit app and a reproducible repository (requirements file, dev container, README).

3. Predictive Modelling Portfolio (Healthcare & Tabular ML)

Python, Scikit-learn, pandas

- Developed end-to-end supervised classification and regression pipelines covering Parkinson's disease detection, loan approval status prediction, house price estimation, and Titanic survival analysis.
- Performed exploratory data analysis, feature preprocessing, and model benchmarking to deliver reliable predictive insights.

4. EstateML — AI Property Recommendation System

Python, Scikit-learn, K-Means, Streamlit

- AI property recommendation system for the Nigerian real estate market; served as AI Lead of Team De Ekklesia, submitted to the Nigeria Prize for Science and Innovation hackathon.
- Combined clustering and buyer-preference matching inside an interactive Streamlit application.

AWARDS & CERTIFICATION

- Most Influential Female, NAPSS (2026)
- Most Outspoken NAPSite, NAPSS (2026)
- TechCrush AI Bootcamp (2026)
- HP AI Courses via edX (2026)
- Tech4Youth AI/ML Certificate (in view)

ACADEMIC HISTORY

University of Nigeria, Nsukka | 2026 – In view
B.Sc. Computer Science

Wisdom Gate High School | 2018 – 2024
West African Senior School Certificate

REFEREES

Available upon request.
